**COPY OF PAPERS
ORIGINALLY FILED**

Add claim 48 as follows:

-- 48. (New) A spectroscopic system for imaging biological tissue comprising:
multiple input ports arranged to introduce light at input locations into biological tissue
and multiple detection ports arranged to collect light from detection locations of the biological
tissue,
at least one light source, operatively connected to a radiation pattern controller,
constructed to generate light of a wavelength in a range from visible to infrared, said light source
optically coupled to at least one of said input ports;
at least one detector, operatively connected to said radiation pattern controller,
constructed and arranged to detect light of said wavelength that has migrated in the tissue region
to at least one detection location and corresponding at least one of said detection ports; and
